I chose option 3 and decided to try to color the US. (excluding Alaska and Hawaii because they border nothing)

How many colors are needed to color the USA?

Which state(s) has the greatest degree? (Land connections only)

Which state(s) has the lowest degree? (Land connections only, excluding Alaska and Hawaii)

Below will be the answers

You will absolutely need 4 colors to solve this, below is the solution.

Both Missouri and Tennessee have the highest degrees at 8!

Maine has the lowest degree at only 1!
